

Prepared by AZ Web Corp for AZ Web Corp

AZ Web Corp

Monthly Google Performance Report

August 1–27, 2026 compared with July 1–27, 2026
Google Search Console + Google Analytics 4

KEY POINTS AT A GLANCE

Status	What immediately matters
Positive	Cloudflare is purged and the correct AZ Web Corp analytics ID is publicly live.
Positive	Several commercial web-development searches are already close to page one.
Needs improvement	Google visibility is not yet producing enough qualified clicks.
Needs improvement	GA4 records form activity, but lead events are not configured as conversions.

Executive summary

During August 1–27, AZ Web Corp received 14 Google clicks from 4,376 search appearances. During the matching July period, it received 13 clicks from 6,250 appearances. This report uses equal-length periods so the comparison is fair.

Measure	August 1–27	July 1–27	Change
Google clicks	14	13	↑ +7.7%
Google impressions	4,376	6,250	↓ -30.0%
Click-through rate	0.32%	0.21%	↑ +0.11 points
Average Google position	57.1	49.3	↓ -7.9 positions

Two quick graphs for non-technical readers:

Google Search Clicks

Google Search Appearances

Where the clicks and visits came from

Search Console reports clicks from Google Search only. It does not include direct visits, social media, referrals or advertising. GA4 identifies the broader traffic source after a visitor reaches the website. Because correct GA4 tracking began only on August 27, the source figures below cover the first three tracked days, not the entire month.

Measurement system	Source represented	Recorded volume	Plain-English meaning
Google Search Console	Google organic search	14 clicks	People clicked AZ Web Corp in unpaid Google results
Google Analytics 4	Direct	33 sessions	Typed/bookmarked visits

			or visits whose source could not be identified
Google Analytics 4	Organic Search	3 sessions	Visits identified as coming from an unpaid search engine result
Google Analytics 4	Paid advertising	0 sessions	No Google Ads traffic was returned
Google Analytics 4	Ecommerce	0 transactions	No online purchase activity was returned

GA4 source and medium detail

Source / medium	Sessions	Users	Engagement rate	Key events
(direct) / (none)	33	25	45.45%	0
google / organic	2	2	50.00%	0
bing / organic	1	1	0.00%	0

Recorded referring pages

Referring page	Sessions	Users	Page views	Key events
nan	29	25	30	0
https://azwebcorp.com/free-seo-audit/	10	4	12	0
https://azwebcorp.com/	8	5	10	0
https://azwebcorp.com/seo-audit-results/?target=azwebcorp.com	2	1	1	0
https://www.google.com/	2	2	2	0
https://azwebcorp.com/contact-us/	1	1	1	0
https://azwebcorp.com/seo-audit-results/?target=khemia.com	1	1	1	0
https://www.bing.com/	1	1	1	0

Important: 'Direct' does not always mean the visitor manually typed the address. It also includes traffic where campaign tags or referral information were unavailable.

Partner and referral links

Referral source	Link status	GA4-attributed sessions	Explanation
Everything IT (everythingit.ie)	Positive	Not separately attributed	Verified live footer link to AZ Web Corp on the homepage and location pages
Google	Positive	2 referring-page sessions	Google appears as a recorded external referring page in recovered data
Bing	Positive	1 referring-page session	Bing appears as a recorded external

		referring page in recovered data
--	--	----------------------------------

Why Everything IT has no exact GA4 count: the footer backlink is active and capable of passing referral information, but the available Analytics rows do not name everythingit.ie. During most of the period, AZ Web Corp was sending analytics to the wrong property, and many recovered visits are classified as Unassigned or Direct. The report therefore confirms the backlink without claiming an unsupported number.

1. Search queries

These are the searches that produced the most clicks and visibility during August.

Search query	Clicks	Impressions	CTR	Position
arizona web company	1	14	7.14%	1.8
50 free instagram followers	1	4	25.00%	81.8
get 50 free instagram followers	1	3	33.33%	108.3
free instagram followers 50	1	2	50.00%	98.0
insta free 50 followers	1	2	50.00%	109.5
get free 50 followers instagram	1	1	100.00%	111.0
web design arizona	0	150	0.00%	62.9
arizona web design	0	80	0.00%	70.2
arizona website design	0	80	0.00%	73.0
web design company arizona	0	69	0.00%	46.4
web developer phoenix	0	69	0.00%	86.9
arizona seo company	0	61	0.00%	51.2
arizona seo	0	59	0.00%	53.2
az web design	0	58	0.00%	72.4
arizona web developer	0	57	0.00%	47.9

Queries gaining month over month

Query	Click change	Impression change	Position improvement
free instagram followers 50	↑ +1	↑ +2	↓ -98.0
insta free 50 followers	↑ +1	↑ +2	↓ -109.5
get free 50 followers instagram	↑ +1	↑ +1	↓ -111.0
arizona web company	↑ +1	↓ -2	↑ +3.4
50 free instagram	↑ +1	↓ -3	↑ +18.4

followers			
web design arizona	↑ +0	↑ +133	↓ -7.4
web design company arizona	↑ +0	↑ +51	↑ +3.5
arizona website design	↑ +0	↑ +45	↓ -15.9
web developer phoenix	↑ +0	↑ +41	↓ -19.5
arizona web design	↑ +0	↑ +26	↓ -17.4

Queries losing month over month

Query	Click change	Impression change	Position improvement
free followers instagram 50k	↓ -1	↓ -1	↑ +105.0
web development phoenix	↑ +0	↓ -108	↓ -16.2
wordpress critical error	↑ +0	↓ -60	↑ +60.5
affordable seo company ahwatukee	↑ +0	↓ -54	↑ +23.3
arizona web development	↑ +0	↓ -42	↓ -16.8
seo for home services arizona	↑ +0	↓ -42	↓ -11.2
seo services tempe	↑ +0	↓ -39	↓ -9.2
arizona seo services	↑ +0	↓ -36	↓ -6.1
web projects in phoenix	↑ +0	↓ -30	↓ -12.8
az web design	↑ +0	↓ -29	↓ -25.6

2. Landing pages from Google

This section shows which pages gained or lost Google visibility and clicks between the two months.

Page	Aug clicks	Jul clicks	Click change	Aug impressions	Jul impressions	Impression change
/	6	8	↓ -2	1,905	1,747	↑ +158
/arizona-seo-services/	1	1	↑ +0	1,572	2,302	↓ -730
/2020/07/29/how-much-does-seo-cost-in-arizona/	0	0	↑ +0	348	1,077	↓ -729
/arizona-web-development/	0	0	↑ +0	265	286	↓ -21
/our-featured-projects/	0	0	↑ +0	163	157	↑ +6
/arizona-digital-marketing/	0	0	↑ +0	112	69	↑ +43
/how-much-does-seo-cost-in-arizona/	0	0	↑ +0	107	0	↑ +107
/seo-company-phoenix-az/	0	0	↑ +0	98	0	↑ +98
/arizona-backend-development/	0	0	↑ +0	75	79	↓ -4

/mobile-app-development-services-arizona/	0	0	↑ +0	30	290	↓ -260
/web-development/	0	0	↑ +0	25	0	↑ +25

3. Countries and devices

Country	Aug clicks	Jul clicks	Click change	Aug impressions	Jul impressions	Impression change
usa	2	7	↓ -5	4,066	5,742	↓ -1676
per	0	0	↑ +0	52	0	↑ +52
gbr	0	0	↑ +0	43	197	↓ -154
ind	3	3	↑ +0	40	108	↓ -68
rus	0	0	↑ +0	25	27	↓ -2
phl	0	0	↑ +0	22	5	↑ +17
idn	1	0	↑ +1	15	5	↑ +10
vnm	0	0	↑ +0	12	18	↓ -6
tur	0	0	↑ +0	10	4	↑ +6
bgd	0	0	↑ +0	10	6	↑ +4
fra	2	0	↑ +2	6	3	↑ +3
pak	1	1	↑ +0	6	7	↓ -1
mex	0	0	↑ +0	6	3	↑ +3
tha	0	0	↑ +0	5	0	↑ +5
mys	0	0	↑ +0	5	1	↑ +4

Device	Aug clicks	Jul clicks	Click change	Aug impressions	Jul impressions	Impression change	Aug CTR
Desktop	2	6	↓ -4	4,142	5,898	↓ -1756	0.05%
Mobile	12	7	↑ +5	232	348	↓ -116	5.17%
Tablet	0	0	↑ +0	2	4	↓ -2	0.00%

Top three countries by recorded website traffic

These GA4 sessions were recovered by filtering the previously incorrect property specifically for the azwebcorp.com hostname.

Rank	Country	Sessions	Users	Page views
1	United States	17	9	37
2	Netherlands	7	7	7
3	Poland	4	4	4

4. Search appearance and image search

Google returned 0 special search-appearance categories for August. Image Search generated 2 query-level impressions in the export. The supporting workbook contains the complete image-query tables for both months.

5. Google Analytics monthly comparison

The correct AZ Web Corp GA4 property began receiving data on August 27. Therefore, July contains no GA4 data and August contains only three days. The figures below are a tracking baseline, not a complete month-over-month business comparison.

GA4 measure	August recorded	July recorded	Meaning
Sessions	36	0	36 visits were tracked after collection began
Users	28	0	28 people were recorded
Page views	58	0	58 pages were viewed
Engagement rate	44.44%	0%	44.44% of sessions were engaged
Key events / conversions	0	0	Conversions are not configured yet

6. Acquisition: how visitors arrived

Channel	Sessions	Users	Engagement rate	Key events
Direct	33	25	45.45%	0
Organic Search	3	3	33.33%	0

7. GA4 landing pages and content

Landing page	Sessions	Users	Page views	Engagement
/	24	20	46	54.17%
/web-development/	3	3	3	0.00%
/arizona-seo-services/	2	2	2	50.00%
(not set)	1	1	0	100.00%
/?gtm_latency=1	1	1	1	0.00%
/arizona-digital-marketing/	1	1	1	0.00%
/contact-us/	1	1	1	0.00%
/seo-audit-results/?target=Azwebcorp.com	1	1	1	0.00%
/seo-audit-results/?target=Prestigewindowsz.com	1	1	2	100.00%
/seo-audit-results/?target=Rtilab.com	1	1	1	0.00%

8. Events and lead activity

Event	Times recorded	Users	Marked as conversion?
page_view	58	28	No
session_start	36	28	No
first_visit	28	28	No
user_engagement	24	12	No
form_start	14	7	No
scroll	13	5	No
form_submit	1	1	No

Important: GA4 recorded 14 form starts and one form submission, but form submission is not marked as a key event. Reported conversions therefore remain zero.

9. Audience location and technology

The workbook contains full country, region, city, device, browser, operating system, language, screen-resolution and hour-of-day tables. Early GA4 counts are too small for reliable strategic conclusions.

Report category	Rows available
Countries	10

Regions	13
Cities	15
Devices	2
Browsers	4
Operating systems	4
Languages	1
Day and hour combinations	20

10. Advertising, ecommerce and referrals

- Google Ads campaign rows: 0. No linked advertising activity was returned.
- Ecommerce item rows: 0. No ecommerce transactions were returned.
- Referrer rows: 8. The detailed sources are preserved in the supporting workbook.
- Organic landing-page rows: 2. Organic GA4 history is currently limited to the new three-day baseline.

11. Actions recommended from this monthly comparison

Priority	Action	Why
Completed	Cloudflare purged and G-R5RNDSSH327 verified publicly	The correct AZ Web Corp stream is now served to visitors and the Lootertech ID is absent
Immediate	Mark form_submit, phone clicks and email clicks as GA4 key events	Monthly reports must show leads, not only visits
This week	Improve pages and snippets for queries ranking positions 4–20	These are the fastest opportunities for qualified clicks
This week	Review pages that lost impressions or clicks from July to August	Stops avoidable month-over-month decline
Monthly	Repeat equal-day monthly comparisons until complete months are available	Keeps reporting fair while Search Console data is delayed

12. Report inventory

This master report covers Google Search performance, queries, pages, query-to-page relationships, countries, devices, search appearance, image search, GA4 acquisition, campaigns, landing pages, content, events, conversions, geography, technology, referrals, Google Ads and ecommerce. The accompanying monthly Excel workbook retains the exact underlying rows for audit and filtering.

Tracking ownership

Item	Confirmed value
Google account	yasirmemon1976@gmail.com
Access level	Administrator
GA4 property	247570709
Correct stream	G-R5RNDSSH327

Overall assessment

AZ Web Corp has meaningful search visibility and several realistic page-one opportunities, but the site is not yet converting that visibility into enough qualified clicks or measurable leads. The month should be viewed as a rebuilding and measurement-baseline period rather than a finished success story.

Area	Assessment	What it means
Search visibility	Needs improvement	Google appearances are lower than the matching July period.
Search clicks	Positive	Clicks are higher than the matching July period.
Referral visibility	Positive	Everything IT's footer backlink is verified live, alongside recorded Google and Bing referrals.
Analytics correction	Positive	Cloudflare was purged; the correct AZ Web Corp ID is publicly live and the Lootertech ID is absent. Earlier-period data still carries the documented historical limitation.
Lead measurement	Needs improvement	Form activity exists, but key events/conversions are not configured.
Growth opportunity	Positive	Several commercial web-development searches already rank close to page one.

Overall rating: PROMISING, BUT TRACKING AND CONVERSION MEASUREMENT NEED IMMEDIATE ATTENTION.

What the customer should remember

- AZ Web Corp is becoming more visible in Google, with several valuable searches close to page one.
- More of that visibility needs to turn into qualified website visits and completed enquiries.
- Analytics is now pointed to the correct account, but conversions must be configured before lead performance can be judged accurately.
- The next month should focus on near-page-one web-development keywords, stronger Google snippets and reliable lead tracking.
