Overall assessment

Area	Assessment	What it means
Search visibility	Positive	Visibility is higher than the matching July period.
Search clicks	Needs improvement	Clicks are lower than the matching July period.
Location visibility	Positive	Cork, Galway, Limerick and Waterford performance is now separated and measurable.
Analytics setup	Positive	The correct GA4 ID is live publicly across the tested pages.
Trend reliability	Needs improvement	GA4 needs a full month before customer traffic and leads can be compared reliably.

What the customer should remember

- Everything IT now has working analytics across the main site and four location pages.
- The report shows which locations, services, pages and keywords generated the strongest Google visibility this month.
- Green upward arrows show improvement; red downward arrows identify the areas that need attention.
- The next report will be more valuable because GA4 will have a complete month of source, referral and engagement data.
